

Air & Gas

AMEX NOOTER has considerable experience in the Air & Gas Industry. We are one of the very few accepted contractors that are approved to do all types of welding functions on oxygen lines. We have built large hydrogen plants, come in on emergency services and perform maintenance functions at many of the air & gas facilities in Northwest Indiana and Northeast Illinois.

Many of our Estimators, Project Managers, Supervisors and Tradesmen have worked in these types of plants for years. We have extensive experience with equipment setting, alignment, and pipe installation with every type of material including carbon, stainless, chrome, lined piping, PVC, polypro, kynar, special alloys, and many other types of materials. Our enclosed, in-house 22,000 square foot fabrication shop in Hammond can handle most anything that cannot be worked on at the job site.

Call us today so we can talk about how we can help you!
